ILLUSTRATIVE EXAMPLE: FICTIONAL COMPANY (Demo Ledger Pvt Ltd), NOT A CLIENT

Demo Ledger

Seed round presentation, fictional example

- Bookkeeping that keeps itself, for Indian small businesses

The problem

- Small businesses in India record sales in WhatsApp and paper, then pay an accountant to retype them at month end.
- Errors and late entries are found only at GST filing time, when fixing them is stressful and slow.
- Owners have no live view of cash, receivables or profit.

The solution

- Demo Ledger reads invoices, bank statements and payment links and posts clean entries automatically.
- Owners get a live cash and profit view on their phone.
- Their accountant reviews exceptions instead of typing everything.

The product

- Capture: photo or forward an invoice, connect a bank account.
- Match: entries are matched to bank lines and flagged when they do not fit.
- Report: GST-ready summaries and a monthly profit view.
- Review: the accountant approves in one screen.

The market (illustrative)

No market numbers are shown because this sample uses no real data.

- Target customers: retail, trading and service businesses with turnover from Rs 50 lakh to Rs 10 crore.
- A real deck states the count of such businesses with its source. The figures here are placeholders.

Business model

- Annual subscription, billed in advance.
- Average revenue per customer: Rs 60,000 per year in year 1, rising 8% a year.
- Cost of delivery about 25% of revenue.

ILLUSTRATIVE EXAMPLE: FICTIONAL COMPANY (Demo Ledger Pvt Ltd), NOT A CLIENT

Traction (invented)

- 40 paying customers at the start of year 1.
- 12% annual churn assumed in the model.
- These numbers are fictional and exist only to show how a traction slide reads.

Go to market

- Partner with accounting firms who bring their small clients.
- Content and tools for GST questions, to attract owners directly.
- A small inside-sales team follows up each trial.

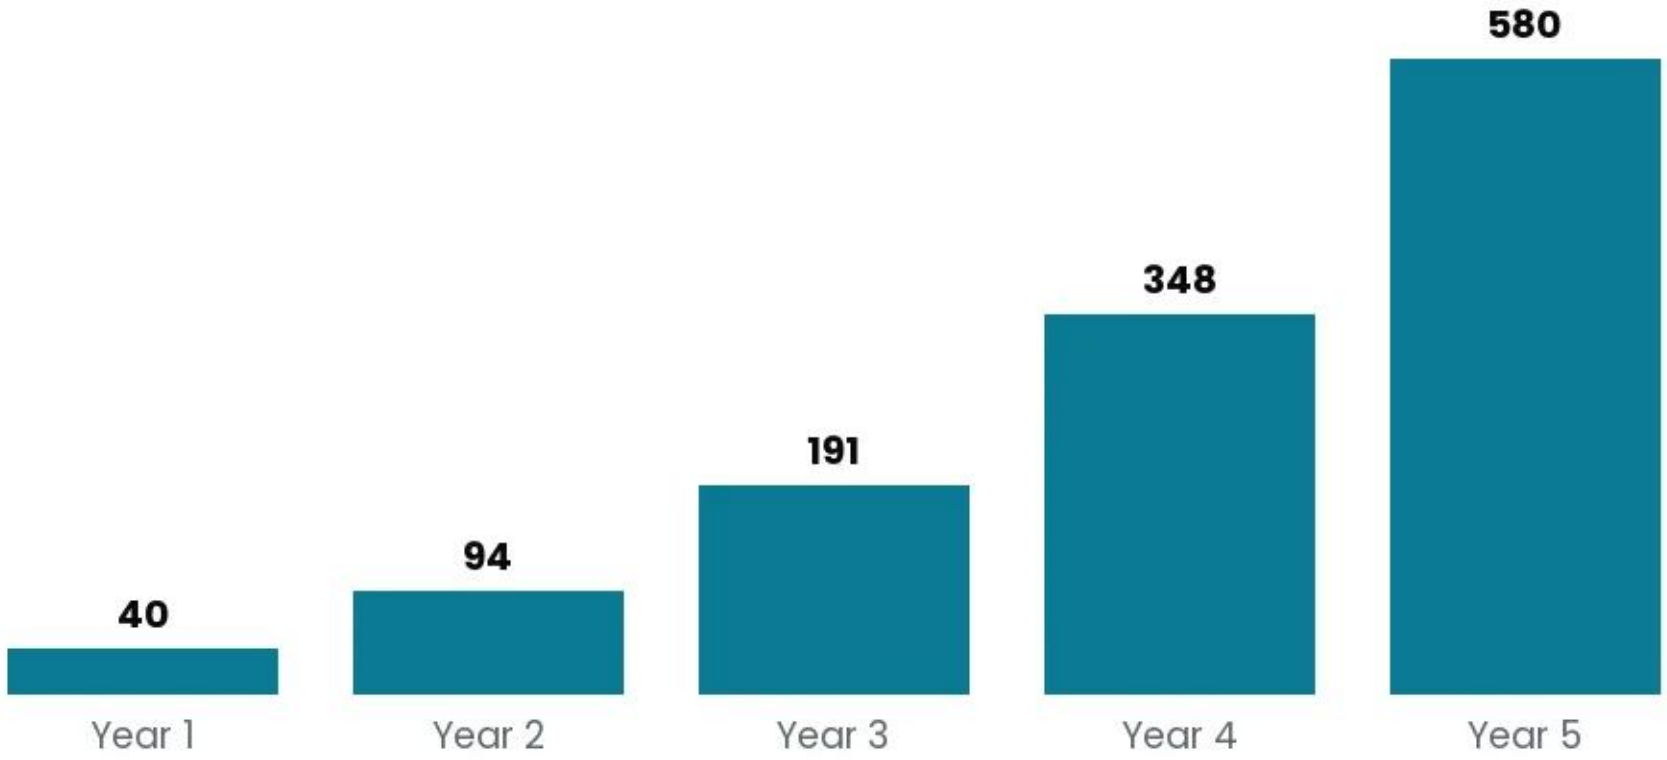

Competition

- Desktop accounting software: strong features, but manual entry.
- Generic billing apps: easy invoicing, weak bookkeeping.
- Our edge: automatic entry plus accountant review, built for Indian GST.

Financial plan: revenue (Rs lakh)

From the sample 5-year financial model. EBITDA turns positive in year 4.

Team (roles only)

- Founder and CEO: product and sales.
- CTO: data extraction and integrations.
- Head of accounting: rules and review workflow.
- Advisors: a chartered accountant and a SaaS operator (placeholders).

The ask

- Raising Rs 150 lakh in equity.
- Use of funds: product team 45%, sales and marketing 35%, operations 20%.
- Milestone: break-even on EBITDA in year 4 on the sample plan.
